○ FIGMA

○ GIT

○ JIRA

○ FIREBASE

○ CI/CD PIPELINES

○ STRONG COMMUNICATION SKILLS

PROJECTS

TRIPMATE

Tripmate is a digital tourism management system for the Gamo Tourism Bureau. It offers app and web versions with features like booking, e-commerce, tour management, blogs, and tourist information, plus analytics for the bureau

HEALTHPILOT

HealthPilot is a platform for health assessment and private doctor consultations. Users can communicate with doctors via chat and video calls. The system includes features such as health assessment results, a chatbot, and more

OWL EVENTS

I'm participating on an application called Owl Events. The main purpose of this app is connecting event organizers with participant. Participant can get tickets on online

MOVIE DISCOVERY APP

I've created a movie discovery app that gives users access to a wealth of information about different movies by retrieving movie details from The Movie Database (TMDB) API

N-GROCERY

I've built a delivery app that connects customers, drivers, and vendors for seamless communication, real-time tracking with Google Maps, and secure payments. Drivers and vendors have wallets for easy earnings management and withdrawals.

EASYEXAM APP

Easy Exam features a Flutter front end and Node.js backend, allowing users to sign up with email or Gmail, save, rate, and answer exam questions. It includes profile management, Chapa payment integration, and filtering for top-rated questions, grades, chapters, repeated questions, and questions for today.

POWER ETHIOPIA

Power Ethiopia provides learning opportunity about solar products and how to use them. with our experienced teachers it provides hands on tutorials and articles on how to use, maintain solar products.
